Perron Hasselt Room Management: Simple Version

Overview

A low-budget back office in WordPress where Perron staff see which rooms are free, keep tenant and contract info, and plan check-ins and check-outs.

Item	Choice
Platform	WordPress + ACF Pro + Admin Columns Pro
Users	Perron staff only, each staff member is a WordPress user
Buildings	Perron 19 (29 rooms) and Perron 17 (12 studios), 41 units in total
Content types	Rooms, Bookings, Maintenance
Not included	Payment tracking, tenant login, online booking

1. Rooms

One entry per unit, 37 in total. This is the list staff check to see what can be offered.

Field	Type	Notes
Room number	Text	e.g. 1.01
Building	Select	Perron 19 / Perron 17
Floor	Number	1 to 4
Type	Select	Room / Studio / Apartment
Contract options	Checkbox	6 months / 12 months / Other
Other contract length	Text	Shown only when "Other" is ticked
All-in price	Number	Monthly, in €
Status	Select	Available / Reserved / Occupied (see section 4)

Field	Type	Notes
Available from	Date	See section 4

2. Bookings

One entry per tenant contract. Tenant details live inside the booking, so there is no separate Tenants section.

Field	Type	Notes
Tenant name, email, phone	Text	
University	Text	
Erasmus	Yes/No	
Room	Relationship	Links to one Room
Contract start / end	Date	
Contract length	Select	6 months / 12 months / Other
Monthly rent	Number	In €
Deposit	Number	In €
Booking status	Select	Upcoming / Active / Ended
Check-in date	Date	
Check-in staff	User	Staff member assigned
Check-in done	Yes/No	
Inspection photos	URL	Link to private photo folder
Tenant confirmed inspection	Yes/No	
Check-out date	Date	
Check-out staff	User	Staff member assigned
Check-out done	Yes/No	
Documents	URL	Link to private folder (see section 6)
Notes	Text area	

3. Maintenance

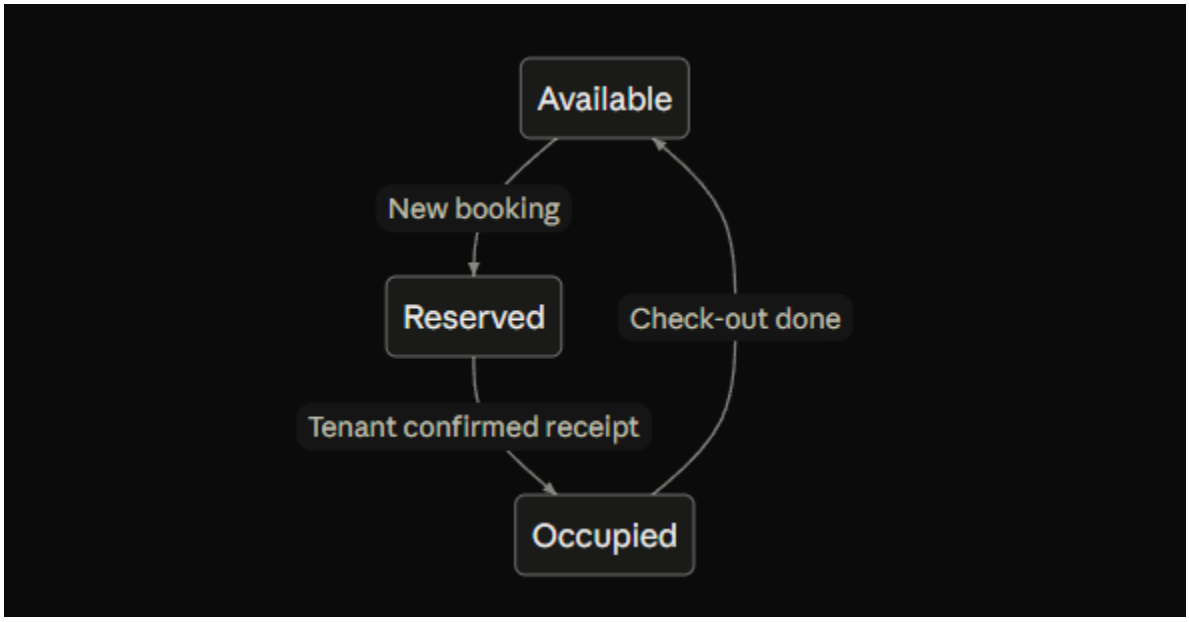

One entry per repair or issue, assigned to a staff member.

Field	Type	Notes
Room	Relationship	Links to one Room
Issue	Text area	
Reported date	Date	
Assigned staff	User	
Status	Select	Open / In progress / Done

4. How Status and Available from work

Status tells staff what the room is right now. **Available from** tells them the first date a new tenant can move in, always the day after the current or upcoming booking ends.

Status	Meaning
Available	Empty and not booked
Reserved	Booked, tenant has not moved in yet
Occupied	Tenant is living there

Examples

Room	Situation	Status	Available from
1.01	Empty, no booking	Available	Today
1.02	Tenant living there until 31 Jan 2027	Occupied	1 Feb 2027
1.03	Erasmus student arrives 1 Feb, leaves 31 Jul 2027	Reserved	1 Aug 2027

When staff update them

Moment	Set Status to	Set Available from to
New booking created	Reserved	Day after contract end
Tenant confirmed the contract	Occupied	No change
Check-out done, no next booking	Available	Today

How staff use it: to find rooms for semester 2, 2026-2027 (starting 1 Feb 2027), sort the Rooms list by Available from. Every room with a date on or before 1 Feb 2027 can be offered. In the examples above, that is 1.01 and 1.02.

5. Admin screens

All screens are list views built with Admin Columns Pro. Saved views are pinned in the admin menu and act as the dashboard.

Screen	Columns	Filters and saved views
Rooms	Number, building, floor, type, status, available from, price	Filter by building, type, status. Sort by available from
Bookings	Tenant, room, start, end, status, check-in date and staff, check-out date and staff	Check-ins this week, Check-outs this month, My tasks (logged-in staff)
Maintenance	Room, issue, reported date, assigned staff, status	Open issues, My tasks

Columns support inline editing, so staff can update a room's status without opening it.

6. Trade-offs and privacy

- **Manual status:** with no code, Status and Available from are updated by hand, so they are only as accurate as staff keep them. A small add-on later (about one day of development) can update them automatically from Bookings.
- **Privacy (GDPR):** do not upload ID cards or contracts into WordPress, because uploaded files get public links. Keep them in a private Drive folder and paste the link into the booking.
- **Later, if budget allows:** payment tracking, automatic status, occupancy timeline view.
